

Sunrise Rotary Global Service Committee – Project Summary

PROJECT NAME	Warm Hearts Foundation (WHF)	Christ's Hope International (CHI)	Health and Humanitarian Outreach Projects (HHOP)
LOCATION	Malawi, Africa	Tanzania, Africa	Honduras
ORGANIZATIONAL SUMMARY	11-year nonprofit organization based in Grand Rapids; provides clean water, sanitation, safe shelter, nourishment, and educational opportunities.	Non-profit based in Traverse City; focus is on AIDS prevention and the care and well-being of AIDS victims and their families – especially orphaned and vulnerable children.	15-year old nonprofit based in Muskegon area dedicated to support, promote and operate international health and humanitarian projects.
PROJECT SUMMARY	Help construct a two or three classroom block, latrines, and desks for a new secondary school in the Mangochi District of Malawi. Travel & work would occur in 2017.	Fund and provide school uniforms, backpacks with supplies and hygiene packs; fund school fees; also possible business to business symposium.	Install water filters and/or dig and build latrines in remote villages. Possibly return to Merendon Region near San Pedro Sula, or other area of Honduras.
PARTNERS	World of Difference (WOD); attempting to link with local Rotary club in Malawi.	Christ's Hope International Tanzania, possibly Mwanza Rotary Club	Usula Rotary Club in San Pedro Sula or other Rotary club in area of project.
SUSTAINABILITY	There is a severe need for schools and classrooms in Mangochi. Currently only 1 high school exists in the entire Mangochi District. WHF and WOD are working together to provide classrooms and latrines throughout this District. In addition to future construction, it is anticipated that opportunities will exist for interaction with teachers & students in the school, as well as helping fund/acquire other educational supplies and resources.	There is great need in this area for ongoing support of orphaned and displaced children, as well as building relationships with schools and businesses who can benefit from expertise, support, and mentoring from members of our club.	The filters will last over 10 years with minimal upkeep. There are numerous regions throughout Honduras in need of clean water and improved sanitary waste systems. Would be possible to send teams on regular basis to install filters, build latrines, and/or assist with other building projects (schools).
VOLUNTEERS	Project could handle 15-25 people at one time; or smaller group(s) could possibly join a larger work group.	Project could handle 20 people at one time.	Projects can handle up to 30-35 at a time. They could potentially handle larger groups.
ACCOMMODATIONS	Modest hotel near Mangochi. There is running water, electricity and modern plumbing. Breakfast and dinner is provided at the hotel, lunches provided at worksite.	CHI has two walled and gated facilities in the area. Also modern hotels are available close by.	Accommodations near work site would be in modest retreat-type compound with running water, electricity, modern plumbing, dorm style sleeping. Breakfast & dinners provided at base, lunches provided at worksite. First and last night in modern hotel in city.
COSTS	Two week trip: approx. \$4,000 includes all expenses and \$1,000 for building materials	10 day trip: approx. \$3025 includes all expenses and \$275 for unis/supplies.	One week trip: Approx. \$2,165 includes all expenses and \$650 for building materials.
