1

Extraction Team Checklist

All vertical supports intact. No posts sheared off at footing

Put all bolts, nuts and fixings together in a sealed bag or bucket clearly marked with the playground identifier P

Don't disassemble parts that will otherwise travel / pack well, e.g., leave small grab rails on posts, leave tunnels assembled, if possible, chain swing can be wrapped around the support bar etc.

Clearly label all pieces in large letters of permanent ink. P1, P2, P3,

Use yellow or white permanent ink on black or other dark coloured pieces if possible

Clearly mark all joints with the numbers of each joining piece e.g., P25 to P28 per the tagging guide

Spot paint each piece with one or two colours for easy identification at handling points. (Dy-Mark 350g Spray and Mark paint from Bunnings)

Generally, each component is tagged on the plan only once. Yellow tags are ones repeated to help with identification or orientation of other pieces

Gaps are provided in the tag sequence so you can add missing or extra tags. Take a photo of the item and advise me at sanders.carola1@gmail.com so I can update the plans

Installation team:

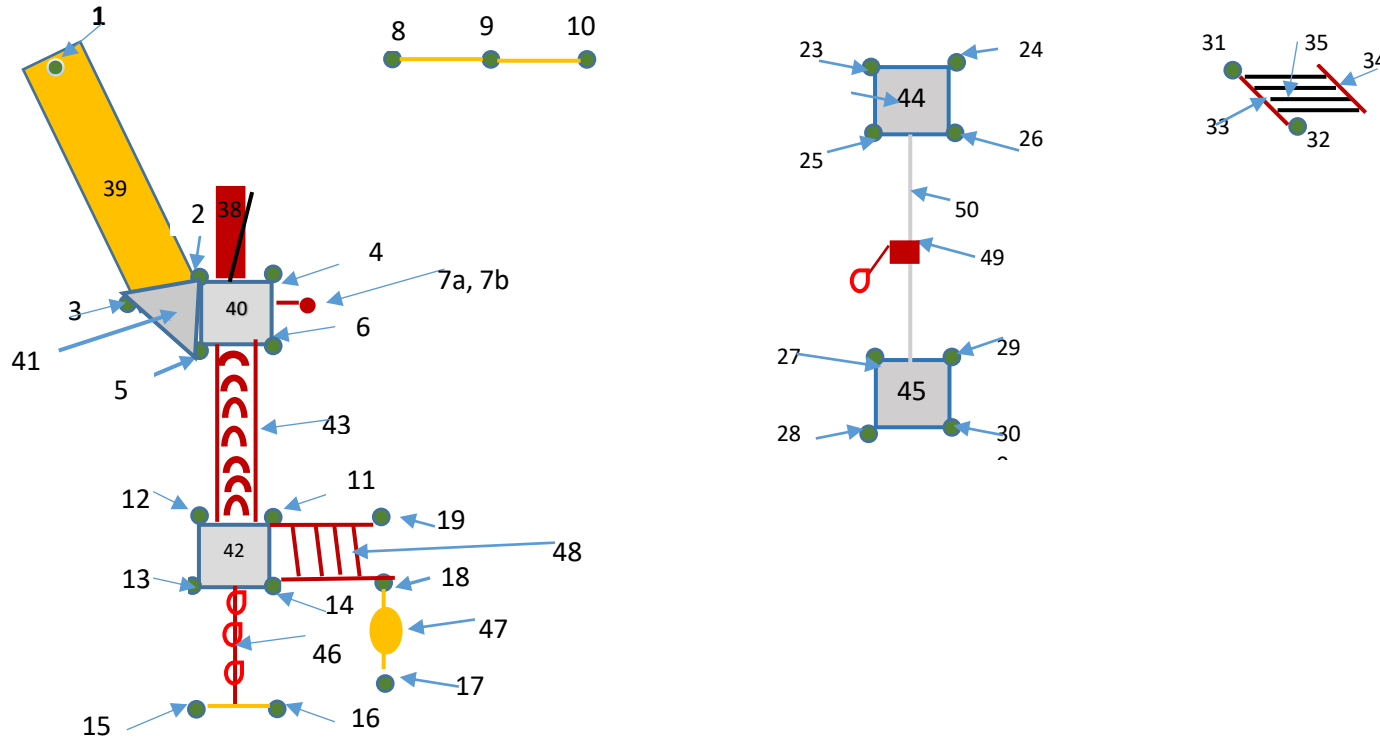

Extra photos without labels have been provided to help put it back together

Send any feedback / comments to sanders.carola1@gmail.com
