

# One Student-One Adult Survival Innovation Challenge

**The One Student-One Adult Program** brings together teams of one student and one adult to develop new product concepts. The student would provide innovative ideas and digital competence.

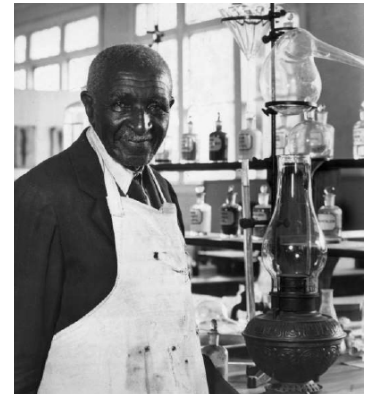

**Participation** in the Innovation Challenge is an opportunity for a student and an adult to work together on an entertaining, useful, and educational project while at the same time building stronger relationships at a time when most students are becoming more independent. Teamwork encourages the student's creative thinking, while the adults help give tangible form to the student's ideas.

## The Challenge

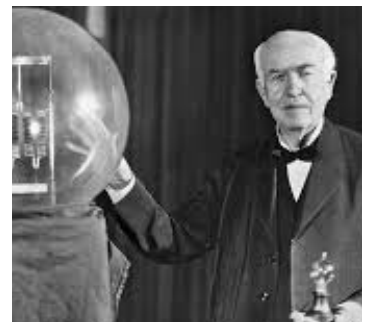

**Design an innovative product** and build a prototype that should include "green" and sustainable features, be developed at a low and frugal cost, and that people suffering economic hardship can use to help them survive. *No apps unless they link to a physical product.*

*KK Gregory*, at age 10, in 1994, invented "wristies" to keep wrists warm in cold weather. Now wristies are available worldwide.

*George Washington Carver*

*Thomas Edison*

*Stephanie Kwolek*

*Steve Jobs*

**Online innovation information sessions** will be available starting Thursday, June 3, from 7pm-7:30pm. Please email us to reserve your spot: [rotaryinnovate@gmail.com](mailto:rotaryinnovate@gmail.com)

### The Winners Will Get Cash Awards and Guidance for Implementation

1st prize, \$1,500 2nd prize \$500 3rd prize \$300

Consolation Prizes (2) \$150

### Who Can Participate?

**Teams of one student and one adult**

**Apply for an application to:** [rotaryinnovate@gmail.com](mailto:rotaryinnovate@gmail.com)

**Final Entry Deadline:** April 15, 2022
