Legacy Project with exposure for the Rotary Club of Kentville

01

MANDATE –

FIND A CLUB SPECIFIC IDEA

02

ROTARY PROJECT –

FOR THE PEOPLE OF THE TOWN

03

EMPHASIZES –

ROTARY'S ESPOSURE FOR THE

PAST, PRESENT AND FUTURE

A Primary Proposal Submission for a Gazebo / Bandstand.

In the idea capture phase, there were varied suggestions for a gazebo like project;
What could a distinctive Rotary facility look like?

What Functionality should it have? Where should it be? How big?
How much will it cost? And on and on ??????????????????????????????????

This early idea needs to be narrowed
to likeminded thought amongst club membership to
effectively move forward with a feasibility review.

Traditional Gazebo thoughts

Higher off the ground it gets, the more complicated become the sight lines, the more difficult for accessibility, the more regulation requirements and much more implementation expense

More on the bandstand side

Without digging too deep – Kentville is currently prepared for larger concerts by utilizing the new stands at the Kentville ball field, (west side) of downtown. Note that

#3 is a Rotary Club of Powel River BC design.

Perhaps a more modern motif . . .

Open to more weather

Ultra-Modern mixed media band stand

Some may like this look . . .

Possibilities found on our doorstep:

Halifax Gardens

Wolfville NS Waterfront Park

A Rotary Look

(Fort McMurray Alberta)

The town of Bridgewater also has a nice gazebo area on the west side of the La Have River

Early Thoughts & Premises

1. Believed to be an existing circuit of users that travel the province seeking such facilities for performances (unconfirmed)

2. Such facilities are often sought after for family gatherings, graduation/wedding photography and various public events

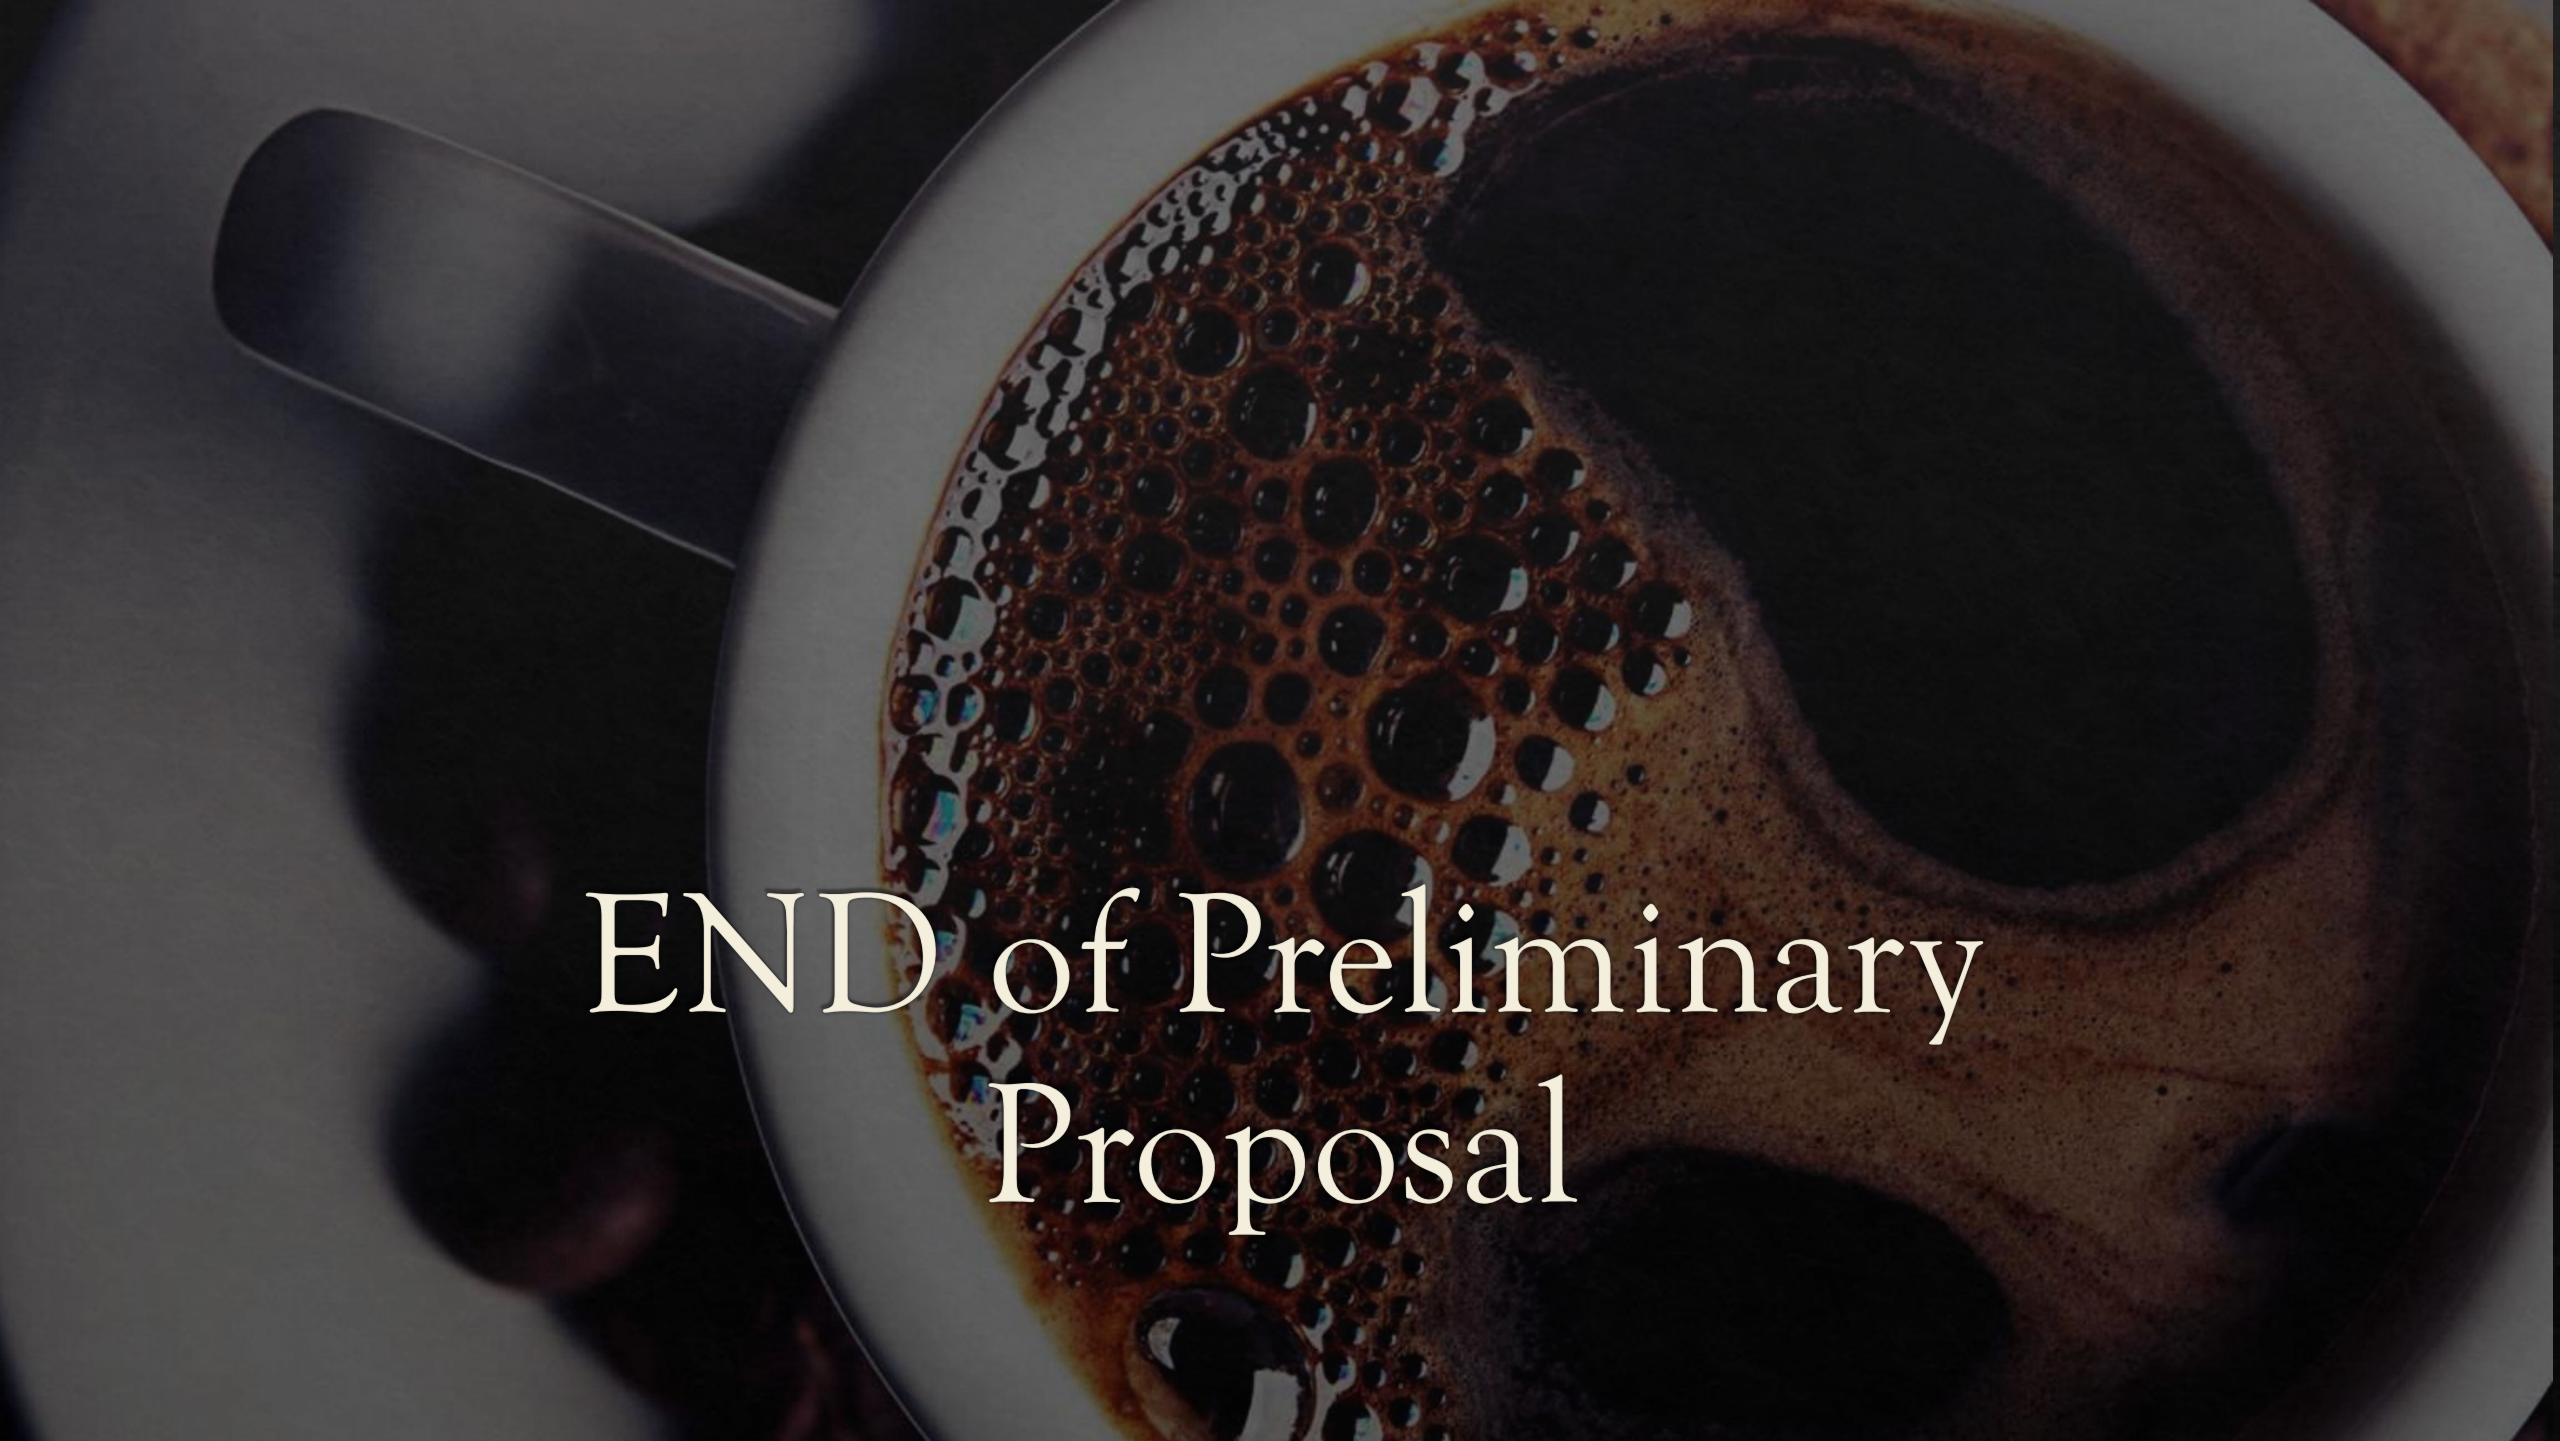

3. There is an interest that the Kentville Barber Shoppers & like groups may wish to practice and perform there in warmer weather (no committed as yet)

4. High visibility site possibility at Berger Hill, East Side of Kentville along old Hwy #1 to New Minas (Discussed with town planner but not confirmed)

5. The Berger Hill area electrical power, high traffic exposure, high-density apartment dwellers and housing nearby; anticipated recreational exposure, biking, coasting, hiking trails. The site is along the Apple Blossom Parade route, near Pumpkin People displays and where thousands gather for these events

6. This proposal meets the committee's criteria for a club (lead) Legacy Project

7. The town is expected to financially participate and to sustain the facility

END of Preliminary Proposal
