PROJECT - The Villages of Mophela and Driefontein

Many thanks to the **Rotary Club of Chilliwack Fraser** for their sponsorship of these two villages!

In May of 2022, 26 hippo rollers and survival garden kits were distributed to Mophela, near Mpumalanga Village and 19 to Driefontein near Ladysmith in the KwaZulu-Natal area of South Africa.

The individuals who received the rollers are currently involved in a **Food Security and Sustainable Agricultural Program**. Not only are the individuals trained to grow vegetable gardens, their training also includes improved food security and resilience in crises like drought, increased income levels, and the influencing of neighbours who are not part of the program. To achieve ultimate sustainability, they are encouraged to transfer to others the knowledge and skills they are learning.
